Message from the Director

Winter, 2018

Dear Friends,

The Clemson Free Clinic provides a wide range of services for the medically underserved through professional volunteers, partnerships and collaborations in this community. Free Clinics are truly their community's response to the health care needs of the uninsured in their area. Our free clinic focuses on providing quality free primary healthcare and pharmaceuticals. Examples of additional services we are able to provide to patients include chronic disease care and management, laboratory and imaging services (off site), women's healthcare, medication access through pharmaceutical assistance programs, nutritional counseling, immunizations, referral services and diabetic self management education.

The continued engagement of volunteer providers and staff powers the mission of the free clinic. We are a community rich in social concerns. The willingness of local volunteer providers and staff to offer care to our patients ensures that our healthcare resources are shared with our neighbors. The Clemson Free Clinic is a compassionate, and cost-efficient healthcare safety net organization.

Our patients can have as many as four or five different diagnosed conditions, often chronic, due to lack of access to care. Our pharmacy staff works closely with medical providers to monitor potential drug interactions and make sure medications are taken by all patients as directed. All of this is done as a part of a quality medication management and compliance program for our patients.

As you know none of this work could be done without donations. In 2017, for every \$1 contributed to a SC free clinic \$7.23 worth of healthcare services were provided. In the Clemson and surrounding area, we also couldn't have provided these services without your support. I like to remind our donors (242 individuals, 12 churches, 11 civic organizations and 16 corporations in 2017) that we see you all standing beside us in spirit every week at the clinic giving evidence of our generous, caring community.

Warm wishes,
Sandra C. Smith, RN, MSN
Executive Director
